

1 Literature Review 2

IPv6 has many proposed changes from IPv4. Select one major change and investigate in detail. By investigate, I mean find an article or official IPV6 RFC documents. If you have another source of information, please ask me about it. Write a report discussing this one change. Include in your report how this one change will effect internets. The effects may not be published - you will need to deduce from the material you have found.

Your report should be approxiamtely three pages. If your report requires more pages, that is ok if necessary. Remember to write concisely.

2 Due Date: Thursday, March 10th

Late assignments will not be accepted.
